Job Experience

React Developer Intern

Xotem technology / 10/2024 - Present

React Developer with internship experience in building responsive and user-friendly web applications. Proficient in JavaScript, React.js, Redux, and modern web technologies with a strong understanding. Skilled in state management and API integration.

Education

B.E - Robotics and Automation with 70%

Erode Sengunthar Engineering College / 09/2020 - 03/2024

Higher Secondary Schooling

St Mary's Boys Higher Secondary School / 06/2018 - 03/2020

Projects

Stalbansprinting (Intern project)

10/2024 - Present

<https://www.stalbansprinting.com/>

- **Designed and developed** a fully responsive printing services website showcasing products like bookmarks, booklets, and memorial printing.
- **Integrated user-friendly navigation** and detailed service pages to enhance customer experience and engagement.

Yearbook.3pstudio - pdf editing

10/2024 - 12/2024

<https://yearbook.3pstudio.us/>

- **Implemented SVG & PNG Drag-and-Drop:** Developed a drag-and-drop feature for managing SVG and PNG assets within the workspace of the yearbook.3pstudio project.
- **PDF Editing & Workspace Customization:** Integrated yearbook.3pstudio PDF editing functionality in *St Albans Printing* and dynamically adjusted the workspace ratio based on the selected design.
- **Enhancements & Feature Improvements:** Contributed to refining the user experience by making functional adjustments and improvements to enhance the project's usability.

Netflix Frontend Clone - HTML CSS Javascript

06/2024 - 07/2024

<https://cloneofnetflix-vjm.netlify.app/>

- **Autoplaying Preview Section:** Implement a content section where each movie or show thumbnail includes a looped video preview that autoplays. Use HTML's <video> for better Ux Design & User Friendly.
- **Layout Design:** Structure the page using semantic HTML and CSS Flexbox to create a clean and organized layout, closely mimicking Netflix's interface.
